Other Tools & Accessories 11
Windows come in all shapes and sizes, so cleaning them can be a time consuming, arduous task if using traditional window cleaning tools. To get this task completed in a faster, safer and easier way, use the patented ProCurve System.

The ProCurve System features a squeegee/washer handle that rotates smoothly on the specially designed tapered fitting of the ProCurve extension pole. The curved design of the extension pole allows the user to accurately control the position of the tool for additional speed and ease of cleaning.

The ProCurve Window Cleaning System has distinct advantages over the traditional method of cleaning windows. With the ProCurve System you can clean windows from top to bottom without removing the squeegee handle from the extension pole, saving time and reducing stress in the user’s back and shoulders.

Easily wash windows of all sizes and shapes including solariums and atriums. Allows user to reach around any obstructions, such as, flowers, shrubs, statuary, etc.

The ProCurve System’s ergonomic design speeds the cleaning process and reduces fatigue.

**Patented**

**Ergonomic** Window Cleaning Extension Pole

**Aluminum - Fluted Fiberglass**

- The aluminum slider and fiberglass handle combination ensures that extension poles are better balanced and more rigid when telescoped.
- Fluted round fiberglass handle and large rubber hand grip provide a better grip.
- Aluminum slider is anodized which prevents rust and provides a smoother extension.
- Curved design allows the user to accurately control the position of the tool for additional speed and ease of cleaning.
- Tapered adaptor fits the ProCurve squeegee/washer handle and also incorporates standard threads for other accessory tools.

**External Locking Device**

- Compression mechanism locks at any extended length.
- Coarse threads provide quick lock and unlock and prevent over-tightening.

NEW
Ergo-Curve™ Patented Ergonomic Window Cleaning Extension Pole

Better Shape for Better Performance
• ERGO-CURVE’s ergonomic tri-lobal handle, a slightly rounded triangular shape, is unique in the extension pole market.
• Naturally fits the user’s hand, making tasks easier and more comfortable with less fatigue.
• Causes less stress on hands and wrists.
• Exclusively from Mr. LongArm.
• Aluminum slider is anodized which prevents rust and provides a smoother extension.
• Curved design allows the user to accurately control the position of the tool for additional speed and ease of cleaning.
• Tapered adaptor fits the ProCurve squeegee/washer handle and also incorporates standard threads for other accessory tools.

Full-Length Grip
• The ERGO-CURVE features an exclusive soft rubber insert and fluted body running the full length of the handle.
• This unique combination ensures a non-slip grip for any hand position.

A Better Locking Mechanism
• ERGO-CURVE’s patent-pending bi-directional compression mechanism provides a secure lock at any extended length.
• No slipping, so no readjustment is needed.
• Requires only a fraction of a turn in either direction to lock and unlock.
